OROCREA

BESPOKE...

In our workshop in Italy we create unique pieces, made by hand by experienced goldsmiths who, like in the Renaissance, have brought their craftsmanship to the level of an Art.

The jewelry pieces we create at Orocrea uniquely marry Beauty and Meaning, combining harmonious and soft forms with symbols and signs from many ancient cultures.

We also specialize in unique, custom-made art pieces with precious stones, for rituals and special uses. They can be prepared for their functions also through the use of Selfica, an art/discipline unique to Damanhur. Selfica makes it possible to concentrate energies that are present in the cosmos so that they can be used for specific, beneficial functions.

In the past, similar techniques were used by many civilizations. Ancient myths say that also the jewelers of Atlantis knew how to create objects that were energetically active.

Atlantis — the myth tells us — was the highest expression of humanity on our planet, a civilization in which the most sophisticated art forms would prosper, harmonizing with alchemies of sound, color and scent. At Orocrea we are inspired by this myth, and strive for beauty, uniqueness and refinement in every piece we make.

We believe that contemplating beauty — and even more wearing it — in everyday life is a very effective form of meditation, one that elevates the vibrational frequency of individuals. People living in beauty can be a happy, harmonious People.

How a MAGIC JEWEL is born

Our goal at Orocrea is to create material forms that are a symbol of evolution. We are in a new epoch, one in which new evolutionary frequencies are entering our spacetime in support of the awakening of humanity. The pieces that we create can help us remember that as human beings, we are a bridge between the material and the spiritual planes, and that we can now reconnect to our full potential.

A magic jewel starts coming to life from an exchange of ideas and intentions between the client and our jewelers. Gradually, thoughts take shape and become a first sketch.

The gems are chosen as well as the forms, and then the hands of a Master Jeweler start molding the noble metals that will make the jewel.

Our jewelers are trained in **alchemy** and **Selfica**, and all the pieces they create convey meanings and specific functions, so that the outer beauty of the jewel can enter into resonance with the inner **beauty** of the person that will wear it.

Our magic jewels are enriched with symbols and signs of Damanhur's Sacred language, an archetypal ancient language. Its signs can work as catalysts of attention and manifestation.

THE PORTAL OF ATLANTIS

This is one of the masterpieces of the Atlantis Line, one of the most beautiful and important jewels realized by our jewelry. The pendant carries lots of meanings and ancient knowledge also. Everything in the jewel is esoterically told through shapes, materials and colours that open up to worlds of beauty and intuition.

It is made by **3 kind of gold**: yellow, white and red.

The central **blu topaz** is a unique gem of more than 81 carats, it radiates intensity and evokes the potential of refinement in the soul in people who observe it. The gem lays on a mystical shape realized in **yellow gold 18 kt**, the purest metal, symbol of the highest and most refined energies we can convey as Human Beings. If the blue of the gem represents the feminine aspect and the lunar energies, the yellow gold represents the masculine aspect and solar energies.

Everything in the jewel reminds us that we are an expression of what is sacred and divine. Through the energy of this jewel you can reawaken the Divine Part inside of you, reaching it through the expression of peace and joy. You find **Sacred Symbols** signs, ideograms full of power, that deal with the archetypal meanings connected with the divine aspect, joy and knowledge.

The **little spiral windings** recall for synchronicity.

OROCREA: YOUR OWN MAGIC JEWELRY

A jewelry piece, activated with the Selfic preparation, becomes a life companion, a beautiful, constant point of focus for your intentions and dreams.

This is the reason why, if you desire, you can have a free conference call to tune into the frequency of your pendant. The meditation will be guided by Ragno Lattuga, a Selfic Jeweler and also the coordinator of the Alchemy School of Damanhur.

DAMANHUR

Founded in 1975, the Federation of Damanhur in Italy is an internationally renowned center for spiritual, artistic and social research.

Damanhur is an eco-society, with a continuously evolving social and political structure. Located in Italy, in the Alpine foothills of Piedmont, with its 600 resident citizens and many more all over the world, Damanhur offers hope and a practical template for a new Renaissance of humanity.

Damanhur is well known for its beautiful underground Temples of Humankind, carved by hand out of the rock. The Temples are an extraordinary complex where art and spirituality are united in the search for new paths of evolution and growth for all humanity.
